LONDON'S FIRST LUXURY RETIREMENT COMMUNITY INSTALLS BIOMETRIC SELF-SERVICE STAFF TIME MANAGEMENT SYSTEM

SUMMARY

Overview

Industry: Care and Retirement

Solution: Kelio Visio X7 Terminals supported by Kelio Pro software

Benefits

- To guarantee highly accurate time and attendance records
- Provide a self-service facility for staff to access their own personnel record and messages
- Automated attendance reports saving time for HR and Payroll staff
- Automate time off and holiday booking requests
- Provide irrefutable staffing level reports for CQC audits
- Provide real time management reports for budgeting and future planning
- Encourage greater employee engagement

Battersea Place is London's first luxury retirement community and employs over 75 staff. 60% of the staff are clinical, providing 24-hour care and emergency assistance for 100 apartments and 30 purpose-built nursing suites. Battersea Place's commissioning administrator, Jonathon Leet explains why they installed Bodet's Kelio Visio X7 system.

What was the challenge you were looking to overcome initially?

"Battersea Place is an exclusive retirement village, so we wanted the very best management systems in place to ensure we provide the highest quality of service for all our tenants and residents. We went for a computerised biometric system as this would streamline clocking in for all staff, and automate many of the processes, saving management time and eliminating paper reports."

What system was installed?

Bodet installed Kelio Visio X7 biometric, interactive communication terminals, supported by Kelio Pro software which incorporates data extraction for payroll, planning, analytics and HR assistant modules. Staff clock in or out by placing their finger onto the Kelio Visio X7 terminal reader. The sensor identifies them and creates a record which is then stored on the master database. The touch-sensitive screen of the Kelio Visio X7 terminal presents an intuitive display panel which allows staff to interact with their own personnel record."

What have you found are the benefits of the system?

"This Kelio system provides accurate real-time reports for HR, payroll, management and staff planning. It automates the whole payroll process, saving staff from having to duplicate data entry and eliminates the risk of manual entry errors. The attendance data can be imported into our payroll software package and allocated to specific roles and cost centres. The self service functionality is especially useful as it involves staff directly in their own time management, making them feel a valuable part of the organisation and helping improve employee engagement."

About Bodet Limited

Bodet has provided clocks, class change, PA and Time and Attendance solutions for over 25 years.

This devotion to constant improvement has enabled Bodet to become the European leader in its sector.
